It is an important topic and I laud the authors for putting this article together. I have a few minor comments:

1. There are grammatical errors which should be corrected as part of the editing process
2. I am not sure if Fig 1 is needed?
3. Fig 3 - it would be good to have comparative figures from Caucasian population
4. Fig 4: I personally think "muslim" as a category should be removed - unless comparisons are made directly with other religious groups
